

ULTRA SECURE ANTI-THEFT TOOL BOXES

We offer an array of optional security features, to customize your Forestry Body tool boxes:

- 1 **Security bar** slides under the multi-point lock tab providing second level security in the event the T-handle latch is compromised
- 2 **Inner door panel** constructed of heavy 12-ga. steel increases strength and protects against forced entry
- 3 **Fully internal 10-gauge steel multi-point slide lock system** on door's outer edge virtually eliminates the possibility of door pry-off or peel-back
- 4 **Multiple hinges** with 7-gauge reinforcement angle provide maximum support for door weight while minimizing opportunity for pried entry
- 5 **Large 3/8-inch diameter T-handle lock rods** improve pry-resistance

- 6 **10-gauge steel collar** prevents deforming of tool box opening and minimizes the likelihood of peeling or prying the door
- 7 **12-gauge lock rod** guides and catches enhance the protective capability of the anti-theft locking system
- 8 **14-gauge steel outer door panel** with full welded corners increases strength and deters forced entry into the box
- 9 **T-handle latches** feature multi-coded lock cylinders with double-bit keys making compartment entry by "picking" or unauthorized key duplication very difficult

THE ARBORTECH ADVANTAGE

... with Heavy-Duty Truck Bodies and Tool Boxes for Tree Care and Landscape Professionals

CHIP BODY

Chip bodies available in 11 - 16 ft. lengths - offer superior quality, fit and finish with maximum payload capacity.

2-in-1
ADVANTAGE

RRB REMOVABLE ROOF CHIP BODY

Removable Roof Chip Body (RRB) is the most versatile forestry body available. RRB easily converts from a chip body to a dump truck.

UAB URBAN AERIAL CHIP BODY

Our urban forestry body gives tree care professionals a compact unit ideally suited for operating on narrow streets and crowded neighborhoods.

ARBORTECH protects your investment with a 3-year limited warranty.
